LIGHT TOWERS

Elliptical light fixtures provide diffuse, less blinding light.

Lockable, high impact plastic doors are rust and dent proof. Doors are full length providing easy service access.

Stamped, one piece 10 gauge skid tub provides superior strength and full protection from ground debris

Mast mounted base winch is cranked while operator is standing (eliminates bending)

Ballasts easy to access through front panel

4 point jack stands provide superior wind stability (up to 65 mph per Mil. spec)

Additional Benefits

- Torsion axle for superior towing and rough terrain handling
- Light fixtures come preinstalled from the factory, reducing setup time
- Easier tower raising due to dual routing of tilt winch cable (2 to 1 mechanical advantage)
- 32 gallon fuel tank provides 67 (Lombardini) or 68 (Cat) hour run time at full load
- 2 year bumper to bumper warranty
- Proven engine – generator combinations
- Emission compliant interim Tier 4 engines

Heavy-duty light towers deliver exceptional lighting

» Trailer-mounted light towers feature a compact, narrow body design for cost-effective transport and storage. A 30-foot adjustable tower rotates 360-degrees for optimum lighting flexibility. Quiet operation, the quietest in its class with sound levels as low as 67 dB(A) at 23 feet, offers maximum versatility for almost any application. These units are ideally suited for illuminating general job sites, site prep, concrete pours, specialty events, parking lots, road work and bridge work. «
